SUMMARY

Frontend web developer specializing in React and Tailwind CSS, with experience building role-based, production-style applications. Strong foundation in JavaScript (ES6+), UI development, and Supabase integration.

SKILLS

PROFESSIONAL

- Frontend: React.js, JavaScript (ES6+), HTML5, CSS3
- Styling: Tailwind CSS, Responsive Design
- BaaS: Supabase (Authentication, Database)
- Tools: Git, GitHub, VS Code, Chrome DevTools

EDUCATION

Nnamdi Azikiwe University
Awka, Nigeria

B.Sc. Computer Science (300 Level)
Expected Graduation: 2026

PROJECTS

- **WORKCONNECT APP**
  https://workconnect-webb.vercel.app
  - Built a role-based web application connecting clients and workers, facilitating seamless service exchange.
  - Implemented separate dashboards for clients and workers to provide tailored user experiences and workflows.
  - Enabled workers to browse available jobs and allowed clients to search for specific workers via an optimized search interface.
  - Integrated authentication and data storage using Supabase, ensuring secure user sessions and real-time data persistence.
  - Tech: React, Tailwind CSS, Supabase

- **EXPENSE TRACKER APP**
  https://expense-handler-app.vercel.app
  - Developed an application for recording and managing daily expenses, helping users visualize their spending habits.
  - Implemented add and view expense functionality using React state management for a responsive, no-reload experience.
  - Designed a clean, intuitive UI using modern CSS principles to ensure accessibility across mobile and desktop devices.
  - Optimized application performance by utilizing efficient component structures and JavaScript (ES6+) logic.
  - Tech: React, Tailwind
