PROFESSIONAL SUMMARY

Full-Stack Developer experienced in building and deploying web applications and REST APIs using React, JavaScript, TypeScript, Python, FastAPI, and PostgreSQL. Experienced in developing responsive user interfaces, authentication systems, role-based access control, dashboards, database integrations, and reusable application components.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Responsive Design, API Integration
Backend	Python, FastAPI, REST APIs
Database & Services	PostgreSQL, SQL, Supabase (Auth, Database)
Tools & Deployment	Git, GitHub, Cursor, VS Code, Vercel, Render, Chrome DevTools

SELECTED PROJECTS

WorkConnect App

React, Tailwind CSS, Supabase, Vercel

- Built and deployed a role-based service marketplace connecting clients and workers.
- Implemented separate client and worker dashboards with tailored workflows and user experiences.
- Implemented authentication and session management using Supabase Auth.
- Built worker discovery/search functionality and integrated Supabase database services for persistent application data.

Single-Store API

Python, FastAPI, PostgreSQL, SQLAlchemy, Supabase, Render

- Developed and deployed a RESTful backend API for single-store management.
- Implemented authentication and role-based access control for customers and administrators.
- Built admin endpoints for product management, admin registration, and customer order monitoring.
- Developed user-facing endpoints for product browsing and personal order history.

Flowfix Plumbing Website

React, Tailwind CSS, Responsive Design

- Built a professional plumbing website presenting services, service areas, customer reviews, and service-request information.
- Developed responsive navigation, reusable UI components, contact/quote request forms, smooth animations, and a custom 404 page.

EDUCATION

Nnamdi Azikiwe University

B.Sc. Computer Science (In Progress)

Expected Graduation: 2027
